
ENVIRONMENTAL POLICY

GENESI ELETTRONICA SRL is a company specialising in the design, manufacture and sale of industrial lighting solutions and electronic boards.

We recognise the environmental responsibility associated with our activities and we are committed to reducing our environmental impact throughout the entire life cycle of our products, from the materials used right through to final disposal.

With a view to sustainable development, we embrace the following principles:

1. Regulatory compliance

We are committed in respecting all applicable environmental regulations at local, national and international levels.

2. Consistent improvement

We aim to constantly improve our environmental impact through:

- Monitoring of energy, water and raw material consumption;
- Reduction of pollutant emissions and waste generation;
- Adoption of more efficient and sustainable production technologies;
- Research and development of electronic and lighting solutions with a low environmental impact (e.g. high-efficiency LEDs, reduced use of hazardous substances, etc.).

3. Pollution prevention

We pay particular attention to the management of chemicals and potentially hazardous materials, with a view to preventing all forms of pollution, through:

- Safe storage of substances;
- Proper treatment of electronic waste (WEEE) and industrial waste;
- Reducing the use of hazardous substances, in line with the RoHS and REACH Directives.

4. Responsible resource management

We optimise the use of natural resources by promoting:

- Energy efficiency in our facilities and finished products;
- The reuse and recycling of materials wherever possible;
- The selection of suppliers and partners who share our environmental principles.

5. Awareness and Engagement

We promote an environmental culture amongst our employees, contractors and suppliers through:

- Training and regular refresher courses;
- Active involvement in initiatives and proposals to improve corporate sustainability;
- Transparent external communication regarding our environmental performance;
- Incentives to encourage the use of electric vehicles and sustainable transport.

6. Eco-friendly planning

When designing new luminaires and electronic boards, we apply the principles of eco-design, with the aim of:

- Increasing the energy efficiency of the devices;
- Extending the product's lifespan and making maintenance easier;
- Facilitating the disassembly of components and recycling at the end of the product's life.

Management's Commitment

The management of **GENESI ELETTRONICA SRL** is committed to providing the necessary resources for the implementation of this Environmental Policy, setting measurable environmental objectives and targets, reviewing them periodically and ensuring they are consistent with the company's strategy.

This Policy is shared with all employees and made available to the public, customers, suppliers and stakeholders.
